

Global Peripherally Inserted Central Catheter Market 2015-2019

Research Report on “ Global **Peripherally Inserted Central Catheter** Market 2015-2019 ”

About peripherally inserted central catheter

Peripherally inserted central catheter is a thin, soft, flexible tube used to inject fluids or medications directly into a vein and or to draw blood samples for testing. The device is inserted in a peripheral vein

in the arm such as the cephalic vein, basilic vein, or brachial vein. It is then advanced proximally toward the heart through increasingly larger veins until the tip rests in the distal superior vena cava or cavoatrial junction. The device has two openings called as lumens used to deliver medications.

Technavio's analysts forecast the global peripherally inserted central catheter devices market to grow at a CAGR of 6.98% over the period 2014-2019.

Covered in this report

This report covers the present scenario and the growth prospects of the global peripherally inserted central catheter market for the period 2015-2019. To calculate the market size, we consider revenue generated from the sales of the peripherally inserted central catheter devices.

Technavio's report, Global Peripherally Inserted Central Catheter Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. The report also covers the landscape of the market and its growth prospects in the coming years. The report includes a discussion of the key vendors operating in this market.

Key vendors

- AngioDynamics
- B. Braun
- BD
- C.R. Bard
- Teleflex

Other prominent vendors

- Argon Medical Devices
- Boston Scientific
- Cook Medical
- Terumo
- Theragenics
- Vygon

Market driver : Technological advancements

Market challenge : High risk of bloodstream infections

Market trend : Increased use of antimicrobial catheters
